Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal, Québec, Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refers to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers Internet access, television distribution, mobile and wireline telephony, business solutions and over-the-top video services in Canada. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment rental and postproduction services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of news and entertainment digital platforms and a music streaming service, the publishing and distribution of magazines, the production and distribution of audiovisual content, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural event management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

The Media segment experiences significant seasonality due, among other factors, to seasonal advertising patterns and influences on people's viewing, reading and listening habits. Given that the Media segment depends on advertising sales for a significant portion of its revenue, operating results are also sensitive to prevailing economic conditions, as they may affect the advertising expenditures of corporations. Accordingly, the interim-period results of operations for the Media segment should not necessarily be considered indicative of its full-year results due to the seasonality of certain of its operations.

Since March 2020, the COVID-19 pandemic has had an impact on some of the Corporation's quarterly results, more particularly in the Media and the Sports and Entertainment segments. Given the uncertainty around the future evolution of the pandemic, including any major new waves, all future impacts of the health crisis on the results of operations cannot be determined with certainty.

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board (IASB), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and, accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2021 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on November 2, 2022.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month and nine-month periods ended September 30, 2022.

In particular, since the second quarter of 2022, restricted cash is presented with cash and cash equivalents on the consolidated statements of cash flows, in line with the IFRS Interpretations Committee's agenda decision finalized in the second quarter of 2022 that clarifies the presentation of cash subject to contractual restrictions agreed with a third party (see note 7). Prior period information has been restated to reflect the new presentation. Accordingly, deferred subsidies used to finance additions to property, plant and equipment related to the roll-out of high-speed Internet services in various regions of Québec are now presented under investing activities, which has the effect of increasing cash used in investing activities by \$26.4 million and \$104.2 million for the three-month and nine-month periods ended September 30, 2022 respectively (\$4.0 million increase and \$202.3 million decrease for the three-month and nine-month periods ended September 30, 2021).

7. RESTRICTED CASH AND DEFERRED SUBSIDIES

On March 22, 2021, Videotron Ltd. ("Videotron") and the Québec government, jointly with the Canadian government, signed agreements to support the achievement of the government's targets for the roll-out of high-speed Internet services in various regions of Québec. Under these agreements, the government has committed to provide financial assistance in the amount of approximately \$258.0 million, which will be fully invested in Videotron's high-speed Internet network extension. In accordance with the terms of the agreements, an amount of \$216.2 million received in advance from the government in March 2021 was recorded as deferred subsidies on the consolidated balance sheets (balance of \$58.2 million as of September 30, 2022). When the investments required under the program are realized, the corresponding subsidies are recognized as a reduction in additions to property, plant and equipment.

8. SPECTRUM LICENCES

11. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

15. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy, which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows based on year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized on the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk, impacted by the financial and economic environment prevailing at the date of the valuation, in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option-pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

² The re-measurement gain in the consolidated statement of comprehensive income for the nine-month period ended September 30, 2022 is mainly due to an increase in the discount rate since December 31, 2021, net of a decrease in the fair value of defined pension plan assets.

15. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of September 30, 2022 and December 31, 2021 are as follows:

	Sept	embe	r 30, 2022	Dec	cembe	r 31, 2021
Asset (liability)	Carrying value		Fair value	Carrying value		Fair value
Long-term debt ¹	\$ (6,709.5)	\$	(6,066.6)	\$ (6,554.0)	\$	(6,660.4)

Cross-currency swaps	565.9		565.9	381.4		381.4

¹ The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing costs.

16. COMMITMENTS

On August 12, 2022, Videotron entered into a definitive agreement with Rogers Communications Inc. ("Rogers") and Shaw Communications Inc. ("Shaw") to acquire Freedom Mobile Inc. ("Freedom Mobile") for \$2.85 billion on a cash-free and debt-free basis. The agreement, which is conditional on regulatory approval, provides for the acquisition of the Freedom Mobile brand's entire wireless and Internet customer base, as well as its owned infrastructure, spectrum and retail outlets. It also includes a long-term undertaking by Shaw and Rogers to provide Videotron with transport services (including backhaul and backbone) and roaming services. This agreement will support the expansion of the Corporation's telecommunications services in Ontario and Western Canada. The transaction is conditional, among other things, on clearance under the Competition Act and the approval of Innovation, Science and Economic Development Canada and would close substantially concurrently with the closing of the acquisition of Shaw by Rogers. Videotron has secured the committed debt financing required for this transaction.

The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.
