#### NON-IFRS FINANCIAL MEASURES

The financial measures not standardized under International Financial Reporting Standards ("IFRS") that are used by the Corporation to assess its financial performance, such as adjusted operating income, cash flows from segment operations and free cash flows from continuing operating activities, are not calculated in accordance with, or recognized by IFRS. The Corporation's method of calculating these non-IFRS financial measures may differ from the methods used by other companies and, as a result, the non-IFRS financial measures presented in this document may not be comparable to other similarly titled measures disclosed by other companies.

#### **Adjusted Operating Income**

In its analysis of operating results, the Corporation defines adjusted operating income, as reconciled to net income under IFRS, as net income before depreciation and amortization, financial expenses, (loss) gain on valuation and translation of financial instruments, restructuring of operations, litigation and other items, gain on sale of spectrum licences, loss on debt refinancing, income taxes and income from discontinued operations. Adjusted operating income as defined above is not a measure of results that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation's parent company, Quebecor, uses adjusted operating income in order to assess the performance of its investment in Quebecor Media. The Corporation's management and Board of Directors use this measure in evaluating its consolidated results as well as the results of its operating segments. This measure eliminates the significant level of impairment and depreciation/amortization of tangible and intangible assets and is unaffected by the capital structure or investment activities of Quebecor Media and its business segments. Adjusted operating income is also relevant

because it is a significant component of the Corporation's annual incentive compensation programs. A limitation of this measure, however, is that it does not reflect the periodic costs of tangible and intangible assets used in generating revenues in the Corporation's segments. It therefore uses other measures that do reflect such costs, such as cash flows from segment operations and free cash flows from continuing operating activities. The Corporation's definition of adjusted operating income may not be the same as similarly titled measures reported by other companies.

Table 1 below provides a reconciliation of adjusted operating income to net income as disclosed in the Corporation's condensed consolidated financial statements.

#### **Cash Flows from Segment Operations**

Cash flows from segment operations represents adjusted operating income, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets (excluding proceeds from disposal of licences). The Corporation uses cash flows from segment operations as a measure of the liquidity generated by its segments. Cash flows from segment operations represents funds available for interest and income tax payments, expenditures related to restructuring programs, business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital, repayment of long-term debt and repurchase of shares. Cash flows from segment operations is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. Cash flows from segment operations is used by the Corporation's management and Board of Directors to evaluate cash flows generated by its segments' operations. The Corporation's definition of cash flows from segment operations is reported, a reconciliation to adjusted operating income is provided in the same section of the report.

#### Free Cash Flows from Continuing Operating Activities

Free cash flows from continuing operating activities consists of cash flows provided by continuing operating activities calculated in accordance with IFRS, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets (excluding proceeds from disposal of licences). The Corporation

uses free cash flows from continuing operating activities as a measure of total liquidity generated on a consolidated basis. Free cash flows from continuing operating activities represents funds available for business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital, repayment of long-term debt and repurchase of shares. Free cash flows from continuing operating activities is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. The Corporation's definition of free cash flows from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 6 provides a reconciliation of free cash flows from continuing operating activities of the Corporation to cash flows provided by continuing operating activities reported in the condensed consolidated financial statements.

#### **KEY PERFORMANCE INDICATOR**

The Corporation uses ARPU, an industry metric, as a key performance indicator. This indicator is used to measure monthly revenues per average basic customer from its cable television, Internet access, cable and mobile telephony services and Club illico. ARPU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of ARPU may not be the same as identically titled measurements reported by other companies. The Corporation calculates ARPU by dividing the combined revenues from its cable television, Internet access, cable and mobile telephony services and Club illico by the average number of basic customers during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

# 2017/2016 second quarter comparison

Revenues: \$1.03 billion, a \$39.6 million (4.0%) increase.

- Revenues increased in Telecommunications (\$39.7 million or 5.1% of segment revenues) and in Media (\$1.8 million or 0.8%).

Adjusted operating income: \$395.3 million, a \$32.6 million (9.0%) increase.

- Adjusted operating income increased in Telecommunications (\$26.3 million or 7.3% of segment adjusted operating income) and in Media (\$8.4 million or 121.7%).
- There was an unfavourable variance in Sports and Entertainment (\$1.4 million).
- The change in the fair value of Quebecor Media stock options resulted in a \$2.9 million unfavourable variance in the stock-based compensation charge in the second quarter of 2017 compared with the same period of 2016. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a \$1.9 million favourable variance in the Corporation's stock-based compensation charge in the second quarter of 2017.

Net income attributable to shareholders: \$231.7 million in the second quarter of 2017, compared with \$91.1 million in the same period of 2016, a \$140.6 million increase.

- The favourable variance was due primarily to:
  - \$87.8 million gain on the sale of a spectrum licence recognized in the second quarter of 2017, including \$43.9 million without any tax consequences;
  - \$32.6 million increase in adjusted operating income;
  - \$31.7 million decrease in the income tax expense;

• \$8.4 million favourable variance in income from discontinued operations.

Partially offset by:

- \$11.5 million increase in the depreciation and amortization charge;

- \$2.5 million unfavourable variance in gains and losses on valuation and translation of financial instruments.

**Depreciation and amortization charge:** \$172.6 million in the second quarter of 2017, an \$11.5 million increase due mainly to the impact of capital expenditures in the Telecommunications segment, including depreciation of investments in the wired and wireless networks and in computer systems.

**Financial expenses:** \$72.9 million in the second quarter of 2017, a \$1.1 million decrease caused mainly by lower average indebtedness and the impact of lower interest rates on long-term debt due to debt refinancing on more advantageous terms.

**Loss on valuation and translation of financial instruments:** \$1.2 million in the second quarter of 2017 compared with a \$1.3 million gain in the second quarter of 2016. The \$2.5 million unfavourable variance was caused mainly by the ineffective portion of fair value hedges.

**Charge for restructuring of operations, litigation and other items:** \$11.8 million in the second quarter of 2017 compared with \$6.1 million in the same period of 2016, a \$5.7 million unfavourable variance.

• An \$11.8 million net charge was recognized in the second quarter of 2017 in connection with cost-reduction initiatives in the Corporation's various segments and customer migration from analog to digital service in the Telecommunications segment (\$6.1 million in the second quarter of 2016).

- There were unfavourable variances in Sports and Entertainment (\$0.7 million) and at Head Office (\$7.0 million). The change at Head Office was mainly due to higher compensation costs and philanthropic activities.

#### SEGMENTED ANALYSIS

#### Telecommunications

#### Second quarter 2017 operating results

Revenues: \$820.1 million in the second quarter of 2017, a \$39.7 million (5.1%) increase.

- Revenues from the mobile telephony service increased \$26.8 million (21.8%) to \$149.6 million, essentially due to growth in the number of subscriber connections and higher net revenue per connection.
- Revenues from Internet access services increased \$13.9 million (5.7%) to \$256.7 million as a result of higher per-subscriber revenues, reflecting, among other things, the favourable impact of the product mix and increases in some rates, customer growth and lower discounts, partially offset by a decrease in revenues from excess usage.
- Combined revenues from all cable television services decreased \$2.1 million (-0.8%) to \$252.9 million, due primarily to the
  impact of the net decrease in the customer base and higher discounts, partially offset by increased revenues from the leasing of
  digital set-top boxes and higher per-customer revenues resulting from, among other things, the impact of increases in some rates.
- Revenues from the cable telephone service decreased \$6.4 million (-6.0%) to \$100.2 million, mainly because of the impact of the net decrease in subscribers and lower long-distance revenues, partially offset by lower discounts and higher per-subscriber revenues.
- Revenues from Club illico increased \$2.4 million (32.4%) to \$9.8 million, essentially because of subscriber growth.
- Revenues of Videotron Business Solutions increased \$4.6 million (17.1%) to \$31.5 million, due primarily to the impact of higher revenues at 4Degrees Colocation Inc. ("4Degrees Colocation") and Fibrenoire inc. ("Fibrenoire").

#### Second quarter 2017 operating results

Revenues: \$231.0 million in the second quarter of 2017, a \$1.8 million (0.8%) increase.

- Broadcasting revenues increased \$12.2 million (11.6%), mainly due to:
  - higher advertising revenues at TVA Sports and TVA Network;
    - higher subscription revenues at TVA Sports.
- Film production and audiovisual service revenues increased by \$1.5 million (11.8%), mainly because of higher revenues from soundstage and equipment leasing due to a larger number of productions in the second quarter of 2017 than in the same period of 2016.
- Newspaper publishing revenues decreased \$4.3 million (-8.4%).
  - Advertising revenues decreased 14.4%; circulation revenues decreased 7.4%; digital revenues were flat; combined revenues from commercial printing and other sources increased 1.8%.
- Magazine publishing revenues decreased by \$5.5 million (-18.8%), due primarily to:
  - lower advertising revenues;

Partially offset by:

- higher operating expenses at TVA Network, including content and labour costs;
- higher content costs at TVA Sports.
- Adjusted operating income from film production and audiovisual services increased by \$1.1 million (122.2%), mainly because of the impact of the revenue increase.
- Adjusted operating income from newspaper publishing decreased by \$2.5 million (-65.8%) due to:
  - impact of the revenue decrease, partially offset by the favourable impact on adjusted operating income of reduced operating expenses, resulting from, among other things, the impact of restructuring initiatives and decreased distribution costs.
- Adjusted operating income from magazine publishing was stable. The decrease in revenues was offset by a reduction in restructuring costs.
- The adjusted operating income of Quebecor Media Out of Home increased by \$0.5 million, mainly because of the impact of the revenue increase.
- Adjusted operating income from book distribution and publishing increased by \$1.6 million. The impact of increased revenues and
  margins in educational publishing and lower operating expenses for distribution and general literature outweighed the impact of
  decreased revenues from general literature and distribution.
- There was a \$0.3 million unfavourable variance in the adjusted operating loss of the music distribution and production business, due primarily to the impact of the revenue decrease.

**Cost/revenue ratio:** Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 93.4% in the second quarter of 2017 compared with 97.0% in the same period of 2016. The decrease was mainly due to the large fixed component of broadcasting operating costs, which does not fluctuate in proportion to the increase in revenues, as well as the impact of restructuring and cost-reduction initiatives.

#### Year-to-date operating results

Revenues: \$441.8 million in the first half of 2017, an \$8.5 million (-1.9%) decrease.

- Broadcasting revenues increased by \$17.0 million (8.1%) due to essentially the same factors as those noted above in the discussion of second quarter 2017 operating results.
- Film production and audiovisual service revenues decreased by \$2.4 million (-8.5%), mainly because of lower revenues from soundstage and equipment leasing due to fewer major productions in the first half of 2017 than in the same period of 2016, partially offset by higher revenues from visual effects, dubbing and post-production.
- Newspaper publishing revenues decreased \$9.0 million (-8.9%).
  - Advertising revenues decreased 15.5%; circulation revenues decreased 6.6%; digital revenues decreased 4.5%; combined revenues from commercial printing and other sources increased 2.7%.

- Revenues of Quebecor Media Out of Home increased by \$0.5 million (7.6%), mainly because of higher advertising revenues.
- Book distribution and publishing revenues decreased by \$0.8 million (-1.9%), primarily as a result of lower volume in mass market and bookstore distribution and lower general literature sales, partially offset by higher revenues from educational publishing.
- Music distribution and production revenues decreased by \$3.1 million (-15.3%), primarily as a result of lower distribution revenues.

#### Second quarter 2017 operating results

Revenues: \$4.0 million in the second quarter of 2017, a \$2.7 million (-40.3%) decrease due primarily to:

#### CASH FLOWS AND FINANCIAL POSITION

This section provides an analysis of sources and uses of cash flows, as well as a financial position analysis as of the balance sheet date.

#### **Operating activities**

Second quarter 2017

**Cash flows provided by continuing operating activities:** \$343.3 million in the second quarter of 2017 compared with \$252.7 million in the same period of 2016.

- The \$90.6 million increase was primarily due to:
  - \$32.4 million decrease in current income taxes due to recognition of tax benefits;
  - \$29.6 million favourable change in non-cash operating assets and liabilities due primarily to favourable variances in accounts payable, accrued charges and provisions in the Telecommunications segment, partially offset by the unfavourable variance in income tax payable;
  - \$26.3 million and \$8.4 million increases in adjusted operating income in the Telecommunications and Media segments respectively.

Partially offset by:

\$5.7 million unfavourable variance in the cash portion of restructuring of operations, litigation and other items.

#### Year to date

**Cash flows provided by continuing operating activities:** \$499.1 million in the first half of 2017 compared with \$472.3 million in the same period of 2016.

- The \$26.8 million increase was primarily due to:
  - \$67.2 million decrease in current income taxes due to recognition of tax benefits;
  - \$44.7 million and \$8.2 million increases in adjusted operating income in the Telecommunications and Media segments respectively;
  - \$13.1 million favourable variance in the cash portion of restructuring of operations, litigation and other items;
  - \$4.7 million decrease in the cash portion of financial expenses.

Partially offset by:

- \$103.9 million unfavourable change in non-cash operating assets and liabilities, due primarily to unfavourable variances in income tax payable and inventory in the Telecommunications segment;
- \$7.0 million increase in the adjusted operating loss of Head Office.

Increased profitability in the Telecommunications and Media segments, and recognition of tax benefits, had a favourable impact on cash flows provided by continuing operating activities in the first half of 2017, while increased inventory in the Telecommunications segment had an unfavourable impact.

**Working capital:** \$104.2 million at June 30, 2017 compared with negative \$386.8 million at December 31, 2016. The \$491.0 million favourable variance was mainly due to an increase in cash and cash equivalents, partly as a result of receipt of \$184.2 million in proceeds from the disposal of an AWS-1 spectrum licence, the entry under assets held for sale of the \$187.0 million book value of the 2500 MHz and 700 MHz wireless spectrum licences sold on July 24, 2017, and the decrease in accounts payable, accrued charges, provisions and income tax payable, partially offset by the impact of entry under current liabilities of the repurchase value and par value of the shares and the security repurchased on July 6, 2017.

#### **Financing activities**

**Consolidated debt** (long-term debt plus bank indebtedness): \$194.9 million reduction in the first half of 2017; \$117.0 million net unfavourable variance in assets and liabilities related to derivative financial instruments.

- Debt was reduced in the first half of 2017 primarily for the following reasons:
  - Redemption by Quebecor Media on May 1, 2017 of the entirety of its outstanding 7.375% Senior Notes issued on January 5, 2011 and maturing on January 15, 2021, in the aggregate principal amount of \$325.0 million, at a redemption price of 102.458% of their principal amount, in accordance with a notice issued on March 31, 2017.
  - Redemption by Videotron on January 5, 2017 and May 1, 2017 of \$300.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount, in accordance with notices issued on December 2, 2016 and March 31, 2017;
  - \$209.3 million reduction in Videotron's drawings on its secured revolving credit facility;
  - \$147.0 million favourable impact of exchange rate fluctuations. The consolidated debt reduction attributable to this item was offset by a decrease in the asset (or increase in the liability) related to cross-currency swap agreements entered under "Derivative financial instruments";
  - Total \$18.9 million reduction in bank indebtedness of Videotron and Quebecor Media;
  - Current payments totalling \$10.0 million on the term loan facilities of Videotron, TVA Group Inc. ("TVA Group") and Quebecor Media.
- Additions to debt during the same period essentially consisted of:
  - Issuance by Videotron on April 13, 2017 of US\$600.0 million aggregate principal amount of 5.125% Senior Notes maturing on April 15, 2027, for net proceeds of \$794.5 million, net of financing fees of \$9.9 million;
  - \$13.5 million increase in TVA Group's drawings on its secured revolving credit facility and bank indebtedness.
- Assets and liabilities related to derivative financial instruments totalled a net asset of \$691.7 million at June 30, 2017 compared with \$808.7 million at December 31, 2016. The \$117.0 million net unfavourable variance was mainly due to:
  - unfavourable impact of exchange rate fluctuations on the value of derivative financial instruments.

Partially offset by:

- favourable impact of interest rate trends in Canada, compared with the United States, on the fair value of derivative financial instruments.
- On July 6, 2017, Quebecor Media repurchased for cancellation 541,899 of its Common Shares held by CDP Capital for an aggregate purchase price of \$37.7 million, payable in cash. On the same date, Quebecor Media also paid off a security held by CDP Capital for \$6.2 million. In the second quarter of 2017, the \$23.3 million excess of the purchase price over the carrying value of the Common Shares and the security was recorded as an increase in the deficit.
- On May 4, 2017, Videotron transferred all then-existing commitments under its unsecured revolving credit facility to its secured revolving credit facility, thereby increasing its secured facility from \$630.0 million to \$965.0 million and terminating its unsecured facility.

#### **Financial Position**

**Net available liquidity:** \$1.45 billion at June 30, 2017 for Quebecor Media and its wholly owned subsidiaries, consisting of \$183.2 million in cash and cash equivalents and \$1.27 billion in available unused revolving credit facilities.

**Consolidated debt** (long-term debt plus bank indebtedness): \$5.46 billion at June 30, 2017, a \$194.9 million decrease compared with December 31, 2016; \$117.0 million net unfavourable variance in assets and liabilities related to derivative financial instruments (see "Financing activities" above).

Consolidated debt essentially consisted of Videotron's \$3.35 billion debt (\$3.17 billion at December 31, 2016); TVA Group's \$79.9 million debt (\$69.1 million at December 31, 2016); and Quebecor Media's \$2.03 billion debt (\$2.41 billion at December 31, 2016).

From time to time, Quebecor Media may (but is under no obligation to) seek to retire or purchase its outstanding Senior Notes in open market purchases, privately negotiated transactions or otherwise. Such repurchases, if any, will depend on its liquidity position and requirements, prevailing market conditions, contractual restrictions and other factors. The amounts involved may be material.

The weighted average term of Quebecor Media's consolidated debt was approximately 6.6 years as of June 30, 2017 (6.1 years as of December 31, 2016). After taking into account the hedging instruments, the debt consisted of approximately 88.0 % fixed-rate debt (83.7 % as of December 31, 2016) and 12.0 % floating-rate debt (16.3 % as of December 31, 2016).

Management of the Corporation believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions and dividend payments (or distribution of capital). The Corporation has access to cash flows generated by its subsidiaries through dividends (or distributions) and cash advances paid by its wholly owned subsidiaries. The Corporation believes it will be able to meet future debt maturities, which are staggered over the coming years.

Pursuant to its financing agreements, the Corporation is required to maintain certain financial ratios. The key indicators listed in those financing agreements include debt service coverage ratio and debt ratio (long-term debt over adjusted operating income). At June 30, 2017, the Corporation was in compliance with all required financial ratios.

#### Distributions declared and paid

- On May 11, 2017, the Corporation declared a distribution, in the form of a reduction of paid-up capital, in the amount of \$25.0 million, which was paid to shareholders on May 11, 2017.
- On August 9, 2017, the Board of Directors of Quebecor Media declared a \$25.0 million dividend which was paid to shareholders on August 10, 2017.

#### **Board of Directors**

On August 7, 2017, the Board of Directors received the resignation of Geneviève Marcon, a Director of Quebecor Media since 2013 and a member of the Corporation's Human Resources and Corporate Governance committees. The Board thanks her for her contribution to the company's success over the past five years.

#### **Financial Instruments**

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, long-term investments, bank indebtedness, accounts payable and accrued liabilities, long-term debt, and derivative financial instruments.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments: (i) to set in Canadian dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, (ii) to achieve a targeted balance of fixed- and floating-rate debt, and (iii) to lock-in the value of certain derivative financial instruments through offsetting transactions. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The carrying value and fair value of long term debt and derivative financial instruments as of June 30, 2017 and December 31, 2016 were as follows:

#### Table 10

Fair value of long-term debt and derivative financial instruments

(in millions of Canadian dollars)

Cross-currency interest rate swaps <sup>3</sup>	695.9	695.9	806.5	806.5

<sup>1</sup> The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

The fair value of long-term debt does not include the fair value of early settlement options, which is presented separately in the table.
 The value of foreign exchange forward contracts entered into to lock-in the value of existing hedging positions is netted from the value of the offset financial instruments.

The fair value of long-term debt is estimated based on quoted market prices when available or on valuation models. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates. An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market, to the net exposure of the counterparty or of the Corporation.

The fair value of early settlement options recognized as embedded derivatives is determined by option pricing models using market inputs, including volatility, discount factors and the underlying instrument's adjusted implicit interest rate and credit premium.

## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month and six-month periods ended June 30, 2017 and 2016 (tabular amounts in millions of Canadian dollars, except for option data) (unaudited)

Quebecor Media Inc. ("Quebecor Media" or the "Corporation") is incorporated under the laws of Québec and is a subsidiary of Quebecor Inc. ("Quebecor" or the "parent corporation"). Unless the context otherwise requires, Quebecor Media or the Corporation refer to Quebecor Media and its subsidiaries. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions (including data centers), cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies, televisual products and video games through its video-on-demand service and video rental stores. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing of books and magazines, the distribution of books, magazines and movies, the distribution and production of music, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, and the operation of two Quebec Major Junior Hockey League teams.

The Media segment experiences significant seasonality due, among other factors, to seasonal advertising patterns and influences on people's viewing, reading and listening habits. Because the Media segment depends on the sale of advertising for a significant portion of its revenue, operating results are also sensitive to prevailing economic conditions, including changes in local, regional and national economic conditions, particularly as they may affect advertising expenditures. Accordingly, the results of operations for interim periods should not necessarily be considered indicative of full-year results due to the seasonality of certain operations.

#### 1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2016 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor Media on August 9, 2017.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month and six-month periods ended June 30, 2017.

#### Deferred share unit and performance share unit plans

The deferred share unit ("DSU") and performance share unit ("PSU") plans are based either on Quebecor Class B Shares and on TVA Group Inc. Class B Non-voting Shares (TVA Group Class B Shares"). The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be, and the PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. The following table provides details of changes to outstanding units in the DSU and PSU plans for the six-month period ended June 30, 2017:

#### 13. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair value measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments :

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of cash equivalents and bank indebtedness, classified as held for trading and accounted for at their fair value in the consolidated balance sheets, is determined using Level 2 inputs.

#### 13. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of early settlement options recognized as embedded derivatives is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's adjusted implicit interest rate and credit premium.

The carrying value and fair value of long-term debt and derivative financial instruments as of June 30, 2017 and December 31, 2016 are as follows:

	June 30, 2017		Decem	ber 31, 2016
	Carrying	Fair	Carrying	Fair
Asset (liability)	value	value	value	value
Long-term debt <sup>1,2</sup>	\$ (5,490.1)	\$ (5,790.1)	\$ (5,669.9)	\$ (5,835.5)
Derivative financial instruments				
Early settlement options	-	-	0.4	0.4
Foreign exchange forward contracts <sup>3</sup>	(4.1)	(4.1)	2.5	2.5
Interest rate swaps	(0.1)	(0.1)	(0.3)	(0.3)
Cross-currency interest rate swaps <sup>3</sup>	<u> </u>	695.9	806.5	806.5

<sup>1</sup> The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

<sup>2</sup> The fair value of long-term debt does not include the fair value of early settlement options, which is presented separately in the table.

<sup>3</sup> The value of foreign exchange forward contracts entered into to lock-in the value of existing hedging positions is netted from the value of the offset financial instruments.
